

VISIBILITY

WATER-
RESISTANT

COMFORT

ALETTA 5605

CHARACTERISTICS

- Quality: 100% polyester with PU coating, 175 gr/m²
- Elastic waist
- Adjustable leg cuffs with press studs
- No pockets
- High-frequency welded seams
- Comfortable and lightweight trousers
- Two reflective bands on the legs
- Wind- and waterproof

Article number: 2.45.605.00

SUITABLE FOR ACTIVITIES IN E.G.

- Civil & hydraulic engineering
- Transport & logistics
- Government services
- Industry
- Maintenance
- Construction

COLOUR

Fluorescent yellow

OTHER AVAILABLE COLOURS

Fluorescent orange (article number: 2.45.607.00)

SIZES

S to 3XL incl.

PACKAGING

- 1 unit per polybag
- 20 units per outer box

EN ISO 20471:2013

EN 343:2003+A1:2007

EN ISO 13688:2013

WASHING INSTRUCTIONS

CLARIFICATION OF PICTOGRAMS

EN ISO 20471:2013+A1:2016 High visibility warning clothing

The EN ISO 20471:2013 standard outlines the requirements for clothing designed to visually emphasise the user's presence and make them stand out more in dangerous situations, both by day and by night.

EN ISO 20471:2013+A1:2016

X = class of the fluorescent reflective surface, ranging from 1 to 3 (see label for the right class)

	Class 1	Class 2	Class 3
Fluorescent material	0.14 m ²	0.50 m ²	0.80 m ²
Reflective material (required length for 50 mm-wide strips)	0.10 m ² (2 m)	0.13 m ² (2.5 m)	0.20 m ² (4 m)

The number next to the pictogram indicates under which class the article falls. This depends on the minimum amount of fluorescent and reflective material used. **Note! The reflective surface of class 1 clothing may not be provided with an overprint.**

EN 343:2003+A1:2007 Protective clothing against rain

The EN 343:2003 standard specifies the requirements and test methods for clothing materials and seams which protect against precipitation (rain and snow), fog and ground humidity. For workwear that complies with the EN 343:2003 standard, water penetration resistance and water vapour permeability are of the greatest importance. These parameters are always stated next to the pictogram. The seams are watertight finished in accordance with the highest class.

EN 343:2003+A1:2007

X = Class of water penetration resistance, ranging from class 1 to 3 (see label for correct class)

Y = Class of water vapour permeability, ranging from class 1 to 3 (see label for the right class)

STORAGE CONDITIONS

The clothing should be kept in a clean, cool and dry place and not kept compressed in its original packaging. Do not expose the clothing to direct sunlight. Never store the clothing wet, always hang it to dry first.

TESTING INSTITUTE

This clothing is certified by: Centexbel (Notified Body no. 0493), Technologiepark 70, BE 9052 Ghent, Belgium.
