ALEX

0985 RWS

CHARACTERISTICS

- Quality: 100% polyester, 185 gr/m²
- Double zipped closure with two-way zipper and snaps
- 100% waterproof due to the sealed seams
- Concealed hood (inside collar)
- Zip-out lining made of 100% polyester
- Fixed nylon lining
- Two zipped front pockets and one inside pocket
- Water- and dirt-repellent finish
- Segmented reflective tape horizontally and vertically (RWS)

Article number: 2.60.986.00

SUITABLE FOR ACTIVITIES IN E.G.

- Road & water works
- Transport & Logistics
- Government services
- Industry
- Trans-shipment services
- Construction

COLOUR

Fluorescent orange

OTHER AVAILABLE COLOURS

Fluorescent yellow (Article number: 2.60.985.00)

SIZES

S to 4XL incl.

PACKAGING

- 1 piece per polybag
- 10 pieces per case

High visibility safety clothing

The EN ISO 20471:2013 standard lays down requirements for clothing that aims to visually emphasize the presence of the user in order to make the user more noticeable in dangerous situations, both day and night.

X = fluorescence class, reflecting surface, from 1 to 3 (see label for correct class)

	Class 1	Class 2	Class 3
Fluorescent material	0.14 m ²	0.50 m ²	0.80 m ²
Reflective material (required length for 50 mm-wide strips)	0.10 m ² (2 m)	0.13 m ² (2.5 m)	0.20 m ² (4m)

The number next to the icon indicates the class in which the article falls. This depends on the minimum surface area of the fluorescent and reflective material.

EN 343:2003
+A1:2007

EN 343:2003+A1:2007 Protective clothing against rain

The EN 343:2003 standard specifies the requirements and test methods for materials and seams of clothing, which protects against precipitation (rain and snow), fog and soil moisture. In the case of work clothing in accordance with the EN 343:2003 standard, waterproofness and water vapour permeability are of the utmost importance. These parameters are always stated with the icon. The seams are waterproofed according to the highest class.

EN 343:2003
+A1:2007

X = Watertightness class, from class 1 to 3

Y = Water vapour permeability class, from class 1 to 3

STORAGE REQUIREMENTS

The clothing should be stored in a clean, cool and dry place and not kept compressed in the original packaging. Do not expose the clothing to direct sunlight. Never store the clothing wet; always allow it to dry hanging first. Make sure that the packaging and the clothing are not damaged when shipped.

TESTING INSTITUTE

This clothing is certified by: Centexbel (Notified Body no. 0493), Technologiepark 70, BE 9052 Ghent, Belgium.
